

MANDI TRENDZ.

Admin User Manual (Manager Guide)

Manage your store's inventory and keep your products up to date.

Accessing the Dashboard

Scroll to the bottom of the website and click Admin Access (or go to login.html directly).

Enter your credentials to log in to the Admin Dashboard.

Inventory Management

Your dashboard allows you to control exactly what appears on the store:

Adding a New Product

Click the Add Product button.

Fill in the Product Name and Price.

Categories (New Feature): Select one or more categories by checking the boxes. This allows the product to appear in multiple sections of your store (e.g., both "Tote Bags" and "Travel" categories).

Image: Either upload an image file from your computer or paste an external Image URL.

Add a brief Description for the item.

Click Save Product.

Editing or Deleting

Edit: Click the Edit icon on any product in the list to update its details, categories, or price.

Stock Status: Click the In Stock / Out of Stock toggle (the checkmark or X icon) to hide or show a product without deleting it.

Delete: Click the Trash Icon to permanently remove a product from the shop.

Visual Badges

In the inventory table, you will see gold badges for each category. This helps you quickly see which sections of the site a product is listed in.
